Transcript:

After reading more about this, I'm really concerned about not only the negative impact on the environment, but also on the company which myself and my wife own. We own a dental practice and we pride ourselves on being on time as much as possible, but unfortunately there's no way for us to get to the location of our dental practice without going past the EJ&E line. If the trains were to increase significantly, we would have a very hard time trying to figure out how we get to work and actually be there on time to not make our patients mad at us for being late for their appointments, which they were on time for and the more and more I look at this the impact to the local area is going to be greater if my business has a trouble, instead of a Canadian company taking advantage of us. So, if there's any questions or you need anymore comments, I can be reached at 630-978-2866. Thank you. Bye
