Transcript:

I have been a resident of New Lenox for over 6 years and I am opposed to the Canadian National Railroads potential purchase of the EJE Railway for many reasons. I know these are the reasons stated on the pamphlet but I agree with them. They are the impact of our emergency services response times due to trains blocking the way. Increased amounts of hazardous material being transported through our community. Traffic congestion in general because of all the trains. Potential costs to residents to deal with the impact of longer and more frequent train traffic and additional train noise in the community. This sale, if it is allowed to be made, will have many negative affects on our community. Thanks for your consideration. Good Bye.
