How will CN's proposed acquisition of the EJ&E impact you?

- \* It will run directly behind our home (vibration)
- \* the trains at present time blow a whistle a few yards from our home (noise)
- \* the dust and pollen that will be blown through the air will blow us, more than likely, not to be able to open windows in the spring and summer (pollution)
- \* Ambulance / fire protection / police emergency school busses. interruptions possibly once a hour if it is 20 trains per day.

Will my house withstand the constant vibration — I already have cracks caused by trains that come only a few times a week let alone what is expected if merger goes through
