

5-14-17

Dear Sir-

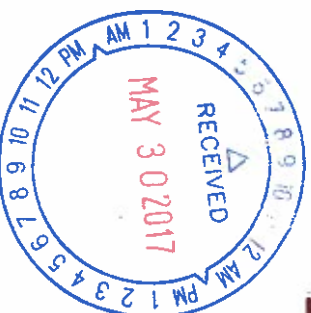

For years our country has abandoned miles of rail lines. Reclaim them if different routes are desired for good reasons. If not don't take more of our great farmland out of production; it is one of this country's greatest natural resources. There will be a point in time when we will cry for farmland. With out great food production all the rails in the country will mean little.

Thanks

Mr. Stuart Glancy
