How will CN's proposed acquisition of the EJ&E impact you?

Primarily the ten fold increase in traffic will dramatically increase the likelihood of accidents & hazardous chemical issues

Those tracks run through the heart of the Lake Zurich community: through backyards, within feet of Little League baseball fields & several schools. In Lake Zurich there is no 50 foot RR easement it is in backyards & on our streets.

If this cannot be prevented, I would like to see funding (federal) to create overpasses throughout the Lake Zurich area.
