381-1589 area code 847. My comment is that I am extremely opposed to this railroad being changed from one railroad track to another railroad track. It doesn't seem to be an equitable fair decision for the residents of my community basically for safety factors, emergency factors, it will cross 4 major highways at the same time. As far as emergency vehicles are concerned, it will completely end emergency situation in our Village. It is for the benefit of a foreign entity to make profits. It does not help the people of our communities from the start of this railroad to the end of this railroad. It doesn't help anybody except the foreign railroad company making more money. It seems to me that people should make more of a difference than a foreign company making more money or the city of Chicago being able to develop more land again for the developers or for more money. How about something for the people this time and not for money. It seems to me like our priorities as far as our country, our state and our community are being given away and not considered in the proper perspective. Thank You Very Much.
