Canadian National Railway Congestion Economic Impact Statement – Village of Barrington

Increased rail congestion will have a substantial negative financial impact to the Village of Barrington as consumers will start fulfilling their needs for goods and services outside of the Village. This impact to our businesses and as such to the community will be significant as 30%-40% of the Village's General Fund revenues are derived from sales tax. The General Fund supports fire and police services, all of the administrative functions of Barrington village government, and several aspects of Public Works functions, including street maintenance and property maintenance.
