Transcript:

I am stating a comment regarding the acquisition of the EJ&E railroad. I am against it because of the delays it would cause at the railraod crossings for the amount of trains that are going to have to be passing through and also, we've already got a lot of congestion on our roads and that would just add to delays on transportation and vehicles getting to where they need to get to. The other thing is, it would cause delays in safety vehicles getting to where they to for emergency responses. Not to mention also causing accidents with the increased number of trains passing through and also just the, it would be a lot more convienent and important for us to be able to use the railway to allow families and travel to their destinations of work without having to commute with their cars. Anyway, that's how I feel and thank you for taking my comments. Bye
