Transcript:

My comments are that I am against more train traffic--having this train merge go through. I am against it. I think it would cause more pollution, it would cause a traffic backup which already happens in Plainfield. I am concerned about safety of children, more noise, more accidents (because cars are going to go around the tracks when they don't want to wait for the train to come through), also emergency traffic is going to have a harder time getting through. I am totally against more trains coming through.
