Any increase in train traffic on the current EJ+E railroad line poses environmental risks impacting the life of nearby residents & wildlife.

- Noise pollution - We live in a rural setting. We chose to live here because of the tranquil environment.

- Danger to wildlife. Especially the many deer which cross daily in the stretch of railroad adjacent to the forest preserve.

- Potential toxic danger. We have serious concern for the proximity of dangerous materials being transported, & possible spillage due to derailment. Possible contamination of Poplar Creek which traverses rural, residential, & commercial areas.

We have serious concerns about any increase in traffic on the EJ+E.
