

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☒ Private property rights infringement and degradation of farmland in rural Montana.

Additional comments: Leave it in the ground!

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☒ Private property rights infringement and degradation of farmland in rural Montana.

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☐ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☒ Private property rights infringement and degradation of farmland in rural Montana.

Stop the Tongue River Railroad Coal Project

Dear Surface Transportation Board,

I oppose the construction of the Tongue River Railroad and urge you to reject this misguided project. The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

☒ Quality of life in rail line communities affected by noise pollution.

☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).

☒ Climate change caused by burning coal that would be transported on the TRR.

☐ Private property rights infringement and degradation of farmland in rural Montana.

The draft EIS released on April 17th does an inadequate job considering harmful impacts on Western Montana rail towns that will see additional coal train traffic if the TRR and West Coast export terminals are built. In addition, new carbon emissions that would result from building the TRR mean the project should be rejected on climate change grounds alone. I am especially concerned about the TRR's impacts on:

- ☒ Quality of life in rail line communities affected by noise pollution.
- ☒ Air quality in neighborhoods right next to the rail line (where highly localized impacts will be more severe than on any given town's air shed considered as a whole).
- ☒ Climate change caused by burning coal that would be transported on the TRR.
- ☒ Private property rights infringement and degradation of farmland in rural Montana.
