Transcript:

My comment is, we must grab this railroad sale and stop it for all the things of this wonderful area. There are very little places left in area of Illinois to live in peace and harmony. All we ask for is to breathe clean air and a little peace and quiet. If this sale goes through, we can kiss all this good bye. They expect the taxpayer to build overpasses while they reap in the profits along with the hazardous waste to our area. Why have we the taxpayer have no rights anymore except to be puppets paying for government excesses unleashed? Something must be done and now to protect our environment and the people of this area. If this sale occurs, our town of New Lenox, Illinois 60451 will be trapped and backed up traffic, more pollution and wasted energy while cars are idling in this backed up mess. How can any of this be good for us, or the surrounding areas? I am a surviving cancer patient and I would like to win my own private war without this extra burden to bear. We are retired, old, and tired of all the hassle without protection from our elected people who made promises to clean up the air and so on and make life better for us and then totally do their own thing with disregard for the little guys. Thank you
