Transcript:

I am a resident of Joliet. I live approximately two miles away from the railroad tracks. I would not accept this acquisition of this freight. We have enough freight trains going on every like say 5 or 10 times an hour already. I don't need expect the horn being blown constantly in my area which it always does. But the back of traffic or trying to get to work so it's always been an issue so I'm totally against this acquisition and wish you guys to stop this proposal because this would just back up the neighborhood and not be a great place to live anymore. Thank you and I hope you take my comments seriously. Thank you. Bye.
