Operations Division

SUBJECT: CEMVR-OD-P-2008-92

Mr. Greg Albansoder
City of Davenport
226 W. 4th Street
Davenport, Iowa 52801

Dear Mr. Albansoder:

Our office reviewed your application dated December 5, 2007, concerning the proposed box culvert construction in Crow Creek in Section 26, Township 79 North, Range 3 East, Scott County, Iowa.

Your project is covered under Nationwide Permit No. 14, as published in the enclosed Fact Sheet No. 6 (IA), provided you meet the permit conditions for the nationwide permits which are also included in the Fact Sheet. The Corps has also made a determination of no impact on federally threatened and endangered species or critical habitat. The Iowa Department of Natural Resources (IADNR) has also issued Section 401 Water Quality Certification for this nationwide permit. The decision regarding this action is based on information found in the administrative record, which documents the District's decision-making process, the basis for the decision, and the final decision.

You are encouraged to conduct your construction activities during a period of low flow. You are required to remove all fill material used as a temporary crossing or cofferdam to an upland, non-wetland site, to seed all disturbed areas with native grasses, and to implement appropriate measures to insure that sediments are not introduced into waters of the United States during construction of this project.

This verification is valid for two years from the date of this letter, unless the nationwide permit is modified, reissued or revoked. It is your responsibility to remain informed of changes to the nationwide permit program. We will issue a public notice announcing any changes if and when they occur. Furthermore, if you commence or are under contract to commence this activity before the date the nationwide permit is modified or revoked, you will have twelve months from this date to complete your activity under the present terms and conditions of this nationwide permit.

Although an individual Department of the Army permit will not be required for this project, this does not eliminate the requirement that you must still acquire other applicable federal, state and local permits. If you have not already coordinated your project with the IADNR, please contact Mr. Kelly Stone in writing or telephone 515/281-8693 to determine if a floodplain development permit is required for your project. You should also contact Ms. Inga Foster of IADNR Sovereign Lands Division in writing or telephone 515/281-8967 to determine if a sovereign lands construction permit is required or if this project may adversely impact Iowa threatened or endangered species or their habitat.

You are required to complete and return the enclosed "Completed Work Certification" upon completion of your project in accordance with General Condition No. 26 of the nationwide permits.

Our office has completed a Preliminary Jurisdictional Determination concerning your project area. A Preliminary Jurisdictional Determination is not appealable.

Should you have any questions, please contact our Regulatory Branch by letter, or telephone Mr. James Kelley at 309/794-5373.

Sincerely,

Original Signed by

Donna M. Jones, P.E.
Chief, Enforcement Section
Regulatory Branch

When the structure or work authorized by this nationwide permit are still in existence at the time the property is transferred, the terms and conditions of this nationwide permit are still in existence at the time the property is transferred, the terms and conditions, will continue to be binding on the new owner(s), of the property. To validate the transfer of this nationwide permit and the associated liabilities associated with compliance with its terms and conditions, have the transferee sign and date below.

5. PROJECT DESCRIPTION AND REMARKS:			
A box culvert crossing over Crow Creek in Eldridge, Iowa is proposed as part of an industrial track railroad extension. The box culvert has been sized and designed by structural and hydraulic engineers with consideration given to the flood flows of Crow Creek and the design requirements of the railroad/AREMA. See the attached plans for additional information.
