Transcript:

I'm calling regarding Docket No. 35087. I'm calling to express my great opposition to this acquisition. I moved into to this community about four years ago. I chose Plainfield because of the new up and coming area and I think this acquisition will take away greatly from the potential of this area. I think it'll greatly impact the home values, which we are already seeing because of this economy. I think the noise and the pollution that the additional trains will bring, are great threats to people who live very close to them, which our community is directly next to the rail line. I'm very much against it. I think that it poses a danger to the children in the area because they can be, they're running around and playing over there so, I am very much against this and I think the increased traffic, again the pollution and the noise are just a great danger to our community. I am very much against this acquisition.
