Submission Text

I'm writing to request an extension of the public comment period for the Tongue River Railroad EIS. I am impressed with all the work that went into the document and I appreciate all of the public outreach that the STB is planning with its public meetings. For this I thank you! I am also concerned that the time for comment is too short as the document is so long and detailed. The railroad has questionable benefit to the the people of Montana and certainly will be detrimental to our national and global environment. Please extend the comment period for more complete and detailed meaningful responses. Sincerely, Paul Schutt 80424
