

Dear Ms. Ball,

I am writing with my concerns about the Railroad sale of Canadian National from E.J. + G. I live so close to the railroad track that I can see when the train goes by. I moved here to New Lenox from the City of Chicago because it did not have the hustle + bustle of all the noise the city has in it. At night time I can hear the train going by when we are trying to sleep, it's bothersome but not to the point annoying. I add my voice to the many other who say please do not add to the traffic of our town. Not only in noise + pollution but in traffic. It has been a problem here in the past few years about the backup at traffic lights + stop signs and it would make it a nightmare if it was any worse. I appreciated you reading my letter and hearing my concerns.
