Transcript:

I am calling in regard to the aggravation of the trains as far as the amount of train traffic that goes through our area and the congestion on the roadway, which is a constant, constant problem 7 days a week, between the noise and the congestion, and you are stuck in traffic burning gas, burning gas and the trains just persist on... there are just too many trains in the area. I would like to voice my complaint to that and I would like to see the reduction as soon as possible.
