Transcript:

First, I think it will cause a public safety problem, with the inability to move from north to south in our community for emergency vehicles and public service vehicles. Secondly, since CN will be making a huge profit, I object to the fact that they will not be supplying any mitigation or any noticable mitigation. I think that we need at least a couple of overpasses in this community, and that the bulk of that, at least, should be paid by CN. Thank you.
