Submission Text

I am opposed to the Tongue River railroad. I live two blocks from the train depot in Helena, Montana, and there are already days when my yard, and my house if the windows are open, fill up with intolerable amounts of diesel exhaust from train traffic. I'm about to be a new mom. My child deserves a healthy environment; this is a right promised to all Montana's, is it not? Effects down the line from the TRR must be considered, and they have not been addressed adequately in the EIS.
