Subject: Rail Road Yard Concern

I would like to express my concern for the environmental impact of the proposed GLBT rail through our county. Not only do we not have the equipment nor the manpower to cover any hazardous spills but our crops, our livestock, and our water sources, both wells and rivers will be devastated. Chemicals sprayed along rail track will effect our crops, contaminating our livestock and possibly passed to the food chain causing health issues for everyone. Our air quality will deteriorate, our economy will suffer, and our home values and property will once again be deflated. I am all for economical growth but not at the expense of human life.
