

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8-27-08

It is because I have six (6) Kids I am here. We are so concerned of the overall negative impact this will have on one of the oldest and greatest communities we have chosen to make our Lifetime investment of home & schools. We are so unhappy with the fact that there is no review of any alternative plans to this deal. This is America — The "Democratic" convention is going on as we speak — we are entitled to the right to explore other avenues of solutions that would make the people happy. So the railroad company has to pay more to work out a better safer solution for our families and children. Please save Barrington and our Life long investment of home, children & schools. I beg you don't ignore the people

Thank you
