

**Petition to the Surface Transportation Board Re AB_167_1189_X
and
National Historic Preservation Act Section 106 Review**

We are residents of Jersey City—of the Hamilton Park neighborhood, most of which is a Municipal, State, and National Historic District, or of the Village area, which is associated historically with the Italian immigrant community in the Downtown.

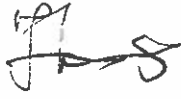

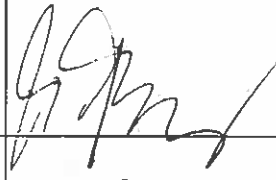

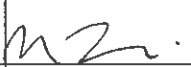

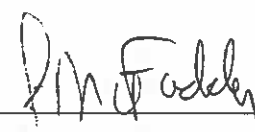

We view the Harsimus Branch as part of the historic fabric of our Downtown, and as a resource for future public uses compatible with historic preservation, the goal of the NHPA.

We therefore ask the Office of Environmental Assessment to recommend the preservation of the entire Harsimus Branch and its Embankment to the STB's directors.

Harsimus Branch demolition and replacement with residential development would cause great harm to our residences, some of which are immediately adjacent to the massive stone structure running through our neighborhoods. Immediate adverse effects would include vibrations from heavy machinery used for stone and soil removal and transport that would damage our fragile historic buildings, not only in the immediate vicinity of the Branch but on local streets and throughout our neighborhood; pollution by known heavy metals and PAHs; noise; and visual scarring. Most seriously and irretrievably, we would lose treasured historic places and the integrity of our Historic Districts would be undermined.
