

06-24-16

Dear Sir,

I am writing to express my objection and concern in regards to the proposed GLBT project. This prodigious planned undertaking is clearly deceptive. No railroad needs a 15,000 acre rail yard. These investors surely have a hidden additional agenda for this property, because they continuously refuse to answer any key facts or give future details. This alone should be a "red-flag".

Hopefully, our governing and regulatory agencies, especially yours, the Surface Transportation Board, recognizes this act of deception and refuses the GLBT's request for approval.

The GLBT is just another example of corporate and investor greed with no concern for anything or anyone but themselves.

I do not feel that it is necessary for me to list all the reasons for objection to this project because members of the STB should already be aware of these factors.

I hope that writing this letter is productive in the effort to extinguish this proposed GLBT project.

Sincerely,

Mr. Richard Lutz, resident
of Grant Park, St. 60940
