Message: This email is regarding the diversion of railway traffic from the western edge of the City of Chicago to the heart of my community. The tracks that the Canadian National RR is proposing to increase traffic on have multiple crossings at grade level with very busy streets and routes. The few trains that use these tracks already create massive backups, and if you increase the train traffic, the backups will generate larger pockets of congestion. There have already been several deaths along these at grade crossings...do you really want to create the opportunity for even more? There are too many schools, churches, and residents that border these tracks. Please do not increase the traffic on this track.
