To Whom It May Concern:

I strongly object to the purchase of the E.T.E. railroad by Canadian National (CN). I feel this is an irresponsible move on the part of the government to allow a FOREIGN COUNTRY to have unfettered control and access to a main railway in the United States. Given the terrorism threat to the United States the government should be ashamed to even considering the sale to CN. You have the power to do the right thing and make the right decision to NOT allow the sale to CN. Sincerely, Katherine
