- ☐ We have no concerns related to the proposed project. MWT anticipates no adverse effects to our sites of cultural significance, by you or your client.
- ☐ The MWT considers this project in compliance with the MWT's section 106 review process with agreed upon mitigations.
- ☐ This site will require the on-site presence of a Tribal Cultural Resource Monitor during ground disturbing activities. Contact the Compliance Review Supervisor with construction schedule.
- ☒ This project has the potential to have "adverse effects" to historic or cultural resources important to our tribe. We recommend the following actions:

Undisturbed portions of the APE soil stratigraphy may be intact in undeveloped areas and may be considered culturally significant. Please provide soil core samples (@ depths of 36") that depict the soil stratigraphy with some sort of key plan (map) that shows where the samples were taken from in relation to proposed ground disturbance. This information will assist in attempts to avoid, minimize, or mitigate potential adverse effects to culturally significant resources.
