

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8-27-08

I strongly oppose this acquisition. It will significantly negatively impact life in all of our communities. The impact on the safety of the community will be significant because of the inability of emergency vehicles to get to people in need. There is no way the massive increase in train traffic, and the length of trains can have a positive effect on our community.

[illegible]

Joliet
