Transcript:

I am calling to state that I am against the acquisition of EJ&E Railway by Canadian National because it would just cause horrible, horrible delays in our traffic. We have been expanding so fast and we haven't built up the roadways yet to handle the traffic we have, much less with the traffic delays and our community is actually dissected by these railways. We have no overpasses or underpasses, we would never, we have emergency vehicles on one side of the tracks and the people living on the other side, we have schools on one side of the tracks, and people living on the other side. It would be an absolute disaster. The crossings safety for the school buses getting across, I mean how much more will we have to pay school bus drivers to drive these kids because they have to sit and wait behind you know, two mile long trains, and eventually somebody's gonna get hurt, eventually some of our kids are gonna get hurt and I can't, I can't have that. Not to mention the pollution, the noise pollution, all of the things that disrupt a community. I just think that it would be a horrible, horrible allocation because Canadian National does not have our best interests at heart, they have the bottom line at heart. Thank you
