Dear Board

JUNE 15

The water flow from my property goes south to the ditch by W. 23rd then travels to the Kankakee River which flows west to Illinois. The water flows from the Kankakee river to the Illinois River to the Mississippi River. If the proposed railroad had an "accident" the hazardous material could contaminate all the water from our wells, the town wells and all the rivers & streams. The tracks through our farmland would be like dams stopping the natural flow which could damage crops & livestock.

NOTE: When an individual chooses to submit an Environmental Comment or some Other Submissions, his or her personal contact information is considered public information and is posted within and outside of STB without additional authorization.
