Transcript:

I am one of many bus drivers in Plainfield school district who uses the roadways in Plainfield and the acquisition of additional trains going through Plainfield is just going to cause major problems. Currently with 16 trains going through town now, we get backed up, we can't get the kids to school sometimes on time because of the backup in traffic and we have to stop at every railroad crossing. So if you increase it from 16 trains to 42 trains, I don't even want to visualize what that is going to do to the traffic in Plainfield, in the streets. I am opposed to the CN acquisition. Thank you.
