I am so concerned about the CN's purchase of the EJ&E railroad. It is totally wrong to have local taxpayers have the burden to fund this project of a Canadian based company to only profit them more and ruin our home values and community. It is also a huge concern with the tracks running only 600 feet from our only high school in this town. With the CN's record of safety with derailments every 3 and a half days, you would fear your child's safety with having to cross the tracks just to get to school.

There is also the fear of emergency vehicles needing to get where they have to. Lives and homes could be at stake with an extra three to five minutes of delays due to train tracks filled with trains. Please continue to fight against this pending destruction of many communities and businesses along this line of track.
