Transcript:

I am calling because I am a concerned resident. We have very bad congestion now due to traffic and it is very difficult even in the morning as we have to have separate times for the school buses to take the kids to school due to all the congestion, and with the additional growth of the area, we are not ready for the traffic as it is now. It will be much worse if this is passed, not to mention the additional financial impact it will have on all of the residents due to the fact that we will have to pay for the infrastructure to support something like this. Those are my concerns. Thank you.
