Transcript:

I am calling regarding the CN Railway Docket No. 35087. I oppose of the purchase of that with all the trains running I am very very concerned mostly about saftey issues. Tying up the roads. The town I live in we don't have a lot of roads that go East-West and the train will be tying up the major road which is army trail a lot of the day which really concerns me, for any emergency vehicles, busses, just transportation getting back and forth from what I understand the quanity of trains and the length of the trains will be a huge impact to our community. I am also very concerned environmental issues also, just that if any spills happen or anything like that that there is a lot of forrest preserves and it is 100% residential so that would be another reason that I just don't feel like its necessary to have all those trains move out to the far west suburb and they believe that they should stay currently are closer to the city of Chicago as it is running now. I don't know what else any other information you need so I just wanted to express my opinion. Thank You.
