Message:

We are against the purposed purchase of the EJ&E rail lines by the Canadian National Railway Company. The increase of trains that the CNR is planning will greatly impact our quality of life if the most profound negative way. We live approximately one city block from the tracks and it is unimaginable what having at least one train an hour will do to our living conditions. The noise and vibrations will be unbearable. We're also very concerned about what type of cargo will be hauled. We've heard there could be toxic substances. Between our home and the tracks is a church with a grammar school which makes the possibilty of such cargo being hauled extremely dangerous. There are also plans in the future for this rail line to be used as a commuter rail to O'Hare Int'l. Airport. CNR's purchase will destroy any possibilty of our community ever having this mass transit system that would benefit the general public by easing traffic congestion and pollution. Please deny The Canadian National Railway this purchase. Thank you for your consideration.
