

Petition to the Surface Transportation Board Re AB_167_1189_X
and
National Historic Preservation Act Section 106 Review

We are residents of the area closest to the Harsimus Branch Embankment's southern side. A part of the neighborhood is Harsimus Cove, a Municipal, State, and National Historic District. Another part is associated with the historic Italian Village.

Harsimus Branch demolition and replacement with residential development would cause great harm to our residences, some of which are immediately adjacent to the massive stone structure running through our neighborhoods.

The Harsimus Cove *Nomination to the State and National Registers of Historic Places* notes that the Embankment is the district's northern boundary. We therefore view the Embankment as part of the Historic District. Any injury to the Embankment is an injury to the Historic District.

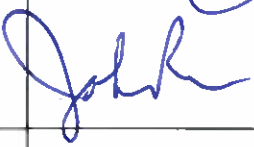

The Embankment is also listed in its own right. The adverse effects of its demolition, of course, would be grievous.

Since our listing, we have come to understand that the longer Harsimus Branch should also be recommended for listing in the State and National Registers. This 150-year-old transportation corridor links historic resources along it and is needed for public uses compatible with historic preservation, the goal of the NHPA.

We therefore ask the Office of Environmental Assessment to recommend the preservation of the entire Harsimus Branch and its Embankment to the STB's directors.
