

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: September 29, 2008

Dear S.T.B.

This is my last ditch effort to get you to realize just how badly the purchase of EJ&E by CN will affect all our lives.

Briefly listed they are: Danger, Congestion, Pollution, Deficits and the destruction of all our lives and livelihoods. This cannot be allowed to happen!

I understand that there is a suitable alternative track running out further in a larger circle, but that CN is too arrogant and complacent to consider it. This would entail far less upheaval to the population (much less) and the structures (and also much less).

Please take the sensible course, I beg you.

sincerely

Maureen E. Yates
