How will CN's proposed acquisition of the EJ&E impact you?

We have so little infrastructure in lake
county today adding stress / traffic to an
already overburdened infrastructure would certainly
impact every aspect of our daily life. i.e.) safety, commute, business
lessening the impact in Chicago at the expense of lake
county suburbanites - is not what it's about. Chicago has
alternative infrastructure. Lake County doesn't.

Buses in Lake Zurich cross the RR 233 time per day
How does that affect our kids safety of commute time.
Many kids activities are close to the RR tracks. Elia Soccer (Wicklow Village,
LZBSA Lions Park, HW swim club, and there are more!
Barrington Metra will no longer be a viable, reliable commuter
station for this area if you can't get to Barrington to
commute downtown.

When I worked at Rt60 in Lake Forest I commuted to LZ the
Mundelein/Vernon Hills train ^{was} always stopped in the tracks. This
would cripple our Lake Zurich/Barrington area local business and
to expedite efficiency of larger business. Vickie Lehar
