

To Phyllis Johnson Bell

I am against 20+ additional trains per day. More trains would increase traffic + waiting time at crossings especially for the 230+ school bus crossings + during rush hours. Increased possibility of car/train accidents at crossings. ~~Increased~~ Increased transport of hazardous wastes + probability of derailment, especially near the High School / Mary Whitney Campus. Increased noise + vibration throughout the Village + the Village will be required to pay for most rail crossing improvements for this Canadian company, and diminished property values and quality of life for Lake Zurich residents.
