Message: STB Finance Docket No. 35087:

The impact of increased freight rail traffic through the town of barrington in which my family and I live is all negative. The town can't handle the traffic load as it is now. The profound impact on emergency response time is of the most concern. Obviously, quality of life issues are the secondary, but important concerns. I fear for the economy of the village businesses if it gets any more difficult to travel within barrington.

Commutes to school could become so long as to adversely affect the students. Please consider.

Appreciatively , Kevin J Armstrong
