CNRR Purchase of EJ&ERR Mitigation Requirements

---

**Conception Volanti's Complaint of Being Ignored  
By CNRR in Informal Proceedings by  
Surface Transportation Board**

I, Conception Volanti, a home owner in unincorporated Cook County, Illinois, am not now nor have I been in the past, been represented by a State, County or Town government entity. My home is located a couple hundred feet from the EJ&E track and is being shaken apart by the 25 to 30 plus trains daily passing near my home.

CNRR has refused to acknowledge the fact that vibration is present. There was no identification of vibration in this area such as there was for the train noise. VIBRATION WAS COMPLETELY IGNORED IN THIS AREA. It is impossible for me, a widow of very limited financial means to retain an engineering firm to establish the relation of train vibration to the damage being done every day to my home. CNRR came into my home and stated that my damage was caused by the previous winters cold. THIS DAMAGE HAS BEEN HAPPENING FOR OVER THREE YEARS AND STARTED WHEN THE TRAIN TRAFFIC INCREASED.

CNRR should be made to identify and document the vibration in this area. STB should be aware of the ground stability and condition in this area. MY COMPLAINT IS NOT UNFOUNDED.
