Transcript:

I'm giving feedback with regard to the proposed Canadian National acquisition of the EJ&E. I'm very much against this. It will create congestion in our area that is not safe and we don't have the infrastructure to support it. We don't have any above-grade crossings and our children will be crossing that railroad to go to and from high school, creating a very dangerous situation for them and also creating unnecessary delays because it will increase the traffic so much there will be no way to predict when they need to leave in the morning and what time they're going to get home being stuck at that. But most important would be the safety situation for those kids. Thank you very much.
