Subject: Re: PMRE 2011 Archaeological Survey Report

Barbara,

I did get your voice mails, but need to head out of the office in a few minutes, so I thought I'd respond via email. I will be providing some general comments to you early next week regarding some examples of problems I see with the report. I will also mark up a few pages with specific comments. I have been advised by members of my staff to request that you make the changes on your end and then provide the SHPO and STB with revised DRAFT documents for another round of reviews. In the meantime, I would also suggest that you work with the SHPO to determine the likely eligibility of the site that was discovered along the Haul Road. This should be done since the area was surveyed and describes as part of the APE. The fact that "there is a strong possibility that the proposed Haul Road will not be constructed" does not justify skipping this step, especially since Site TYO-00276 appears to be the only significant site identified during the entire survey. What if the Haul Road IS constructed and the site is destroyed?

I would have members of your staff begin an editorial overhaul of the report. There are multiple grammatical errors in the report that can be addressed right away. I would also be certain that the organization of the report is improved. For instance, the discussion of the probability areas and how they were derived needs to be more clearly discussed (discussion on pages 3 and the bottom of page 4 should be combined). I understand that you have a tight schedule, but I will need to ensure that we only approve documents that meet the SOI and AK SHPO standards as you agreed to do in the MOU.

-Cathy
