### Transcript:

I would like to state my opposition to the merger of EJ & E railroad and there are way too many trains and the noise. It's the hazmat material, emergency response vehicles have problems getting through, children you know going to school, and it's a potential accident situation and traffic just to name a few that would cause this problem of this merger. So I am in opposition to the Canadian National and the EJ & E railroad acquisition. Thank you so much and have a good day. Bye.
