

June 8, 2016

Dear Sir,

After thinking about the proposed GLB rail line, I am wondering what effect the creosote rail road ties will have on my well water.

Since the well is 13 feet from the rail easement, is the grease and oil in the journal boxes also going to have an adverse effect on the ground water?

I am opposed to this project as it will be detrimental to the environment.

Sincerely,

A handwritten signature in black ink, appearing to read "Ron Mackinnon". The signature is stylized with a large, looping initial "R" and "M".
