Transcript:

I calling back to state also, besides the other things I mentioned, we are American citizens, we should have presidence over a foreign country bringing unwanted noise pollution and environmental pollution. It's a threat to our way of living and our safety and our childrens safety and that of the animals and everybody around us. It would cause air pollution. We are american citizens. We are not Canada. Canada has no right, and you have no right, to put Canada above the United States citizens. Thank you.
