This pertains to finance docket FD-35087. As a leader in the community and want to express not only and a resident her, not only my personal, but also our church's support for the purchase of the EJ&E Railway on account that the traffic tie up and the amount of activity of vehicles buzzing around alternative transportation routes on account of being stopped by trains. It has made the areas quite dangerous for children playing outdoors in that cars dash by trying to beat certain intersections and to reduce the number of freight trains that come through this community would be very important for it's safety as well as, of course, our convenience, but primarily as a pastor in the community I'm concerned too for the safety of our residents. So please take these things into consideration and I thank you for doing so and ask that you move ahead with the purchase agreement. Thank you
