Message: I would like it to be know to the STB how greatly opposed I am to the acquisition of the CN Railway. In addition to this acquisition costing me the tax payer and dividing our beautiful community, I have numerous concerns. I feel the DEIS has inadequately addressed several issues. My main concern is the impact this will have to public safety and response time, especially in an area where the fire district is already struggling financially. Safety to our predestrian residents, especially the children and teenagers. I have children and friends with children that will be having to cross those tracks on a daily basis to and from school. Additionally, I feel our health will be at risk, breathing in all the soot coming from each of those trains. How can that be a good thing?

Please rethink and study VERY HARD the impacts this will have not only to the community but to each individual in New Lenox!
