RCCell4952@AOL.com I am calling because I don't think anybody is aware more than the people who will be so involved (thousands of us) by the acquisition of the railroad by the Canadian Railroad. To increase traffic from 5 trains to 25 a day is inconceivable. From an environmental standpoint, I don't know how you could possible vote yes on this. We are all terribly, terribly very upset and we wish that you would certainly look into this and understand that from a pollution environment, from a noise pollution environment, this is very difficult to understand how anybody would want to subject people to this scenario. I cannot believe it. If you have other peoples' interest, which you should all have, you cannot possibly allow this to happen. Thank you..
