

3-24-16

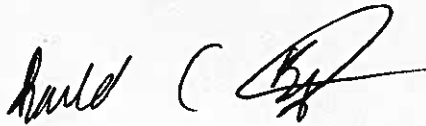

To Whom It May Concern:

I'm writing to you in regards to the Great Lakes Basin Railroad Project. My family and I are very much opposed to this project due to the following concerns:

1. The hazardous material to be moved by this railroad could have a huge negative impact on the environment, should there be a spill.
2. There are safety concerns due to possible derailments and or accidents with the public when crossing roads.
3. Traffic being stopped at crossings, slowing down emergency response vehicles, losing valuable time needed in saving lives.
4. The interruption of traffic flow, making longer drive times for the public to get to and from work.
5. Blocking roadways with train traffic, making it difficult for farmers to get implements to their fields.
6. The railroad will also have a negative impact on our precious wildlife, streams and rivers.

Eminent Domain laws were put in place for the good of the public as a whole, to be used to build schools and hospitals etc. The laws were not intended for use by a private citizen or corporation to make money at the expense of others. This railroad is ethically and morally wrong, and should not proceed any further, in any way, shape or form.

Thank You
